INVESTMENT COMMENTARY

Global equity markets rose in May measured in US dollars, as optimism about the strong demand for artificial intelligence (AI) lifted the share prices of US technology companies and other AI beneficiaries.

Emerging market equities underperformed global equity markets in May. The AI theme also remains a key trend in emerging markets, as evidenced by the Taiwanese market delivering the strongest returns last month and year-to-date. SKAGEN Kon-Tiki has exposure to AI demand through several of our attractively valued and sometimes overlooked companies.

SKAGEN Kon-Tiki outperformed the emerging markets index during the month. The largest contributor to fund performance was the South Korean cosmetics R&D and production company Cosmax. Cosmax delivered stronger than expected results as the company continues to benefit from a structural growth trend given the global beauty market's increasing demand for independent brands. The Chinese financial conglomerate Ping An Insurance benefitted from an improving market sentiment towards Greater China listed equities. LG Electronics gained on the back of increased focus from the market on the company's exposure to AI through its cooling systems for datacentres.

On the negative side, Samsung Electronics was the largest detractor. The next four largest negative contributors were all Brazilian companies on the back of general market weakness due to concerns around the government's handling of independent institutions and the fiscal policy direction. Samsung Electronics' share price fell at the end of the month as a union representing around a fifth of the workforce called a strike after wage negotiations broke down. The market reacted negatively to Suzano's confirmation of its interest in acquiring US-listed International Paper. The increased likelihood of a prolonged period of high interest rate levels also weighed on Assai, Raizen and Cosan due to their higher debt burdens. However, we believe these to be manageable, somewhat in recent months, it remains over 40% compared with the MSCI Emerging Markets Index.

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skill, the fund's risk profile and management fees. The return may become negative as a result of negative price developments. There is a risk associated with investing in the fund due to market movements, currency developments, interest rate levels, economic, sector and company-specific conditions.

RISK PROFILE

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Other risks not included in the summary risk indicator but materially relevant: Event risk, liquidity risk, operational risk, counterparty risk, derivatives risk. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could lose some or all of your investment.
