

Performance Commentary

January got off to a great start in the global and Nordic equity markets, and SKAGEN Vekst followed suit. The global equity market rally came to an abrupt halt, however, due to growing concerns around the Wuhan coronavirus outbreak in China. This has clearly had a negative impact on global travel and given rise to uncertainties regarding global production and growth.

SKAGEN Vekst lagged the combined index in January due to the fund's lower exposure to US growth shares. As fears of global growth have hit the energy market, our exposure to natural gas meant a negative contribution from freighters like Flex LNG and Golar LNG and producers such as Gazprom and Shell. On the positive side, we saw strong performance from our largest position Novo Nordisk on the back of the positive news flow around new products and optimistic growth predictions for their weight reduction drugs. Our Swiss producer of pharmaceutical and chemicals, Lonza Group, also delivered very strong figures, which brought the share price to new highs. The stock is up more than 65% over the past 12 months.

The fund selects low-priced, high-quality companies in the Nordic region and from around the world.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

Effective 1/1/2014, the Fund's investment mandate changed from investing a minimum of 50% of its funds in Norway to investing a minimum of 50% of its funds in the Nordic countries. This means that returns prior to the change were achieved under different circumstances than they are today. Prior to 1/1/2014, the benchmark index was an evenly composed benchmark index consisting of the Oslo Stock Exchange Benchmark Index (OSEBX) and the MSCI All Country World. The benchmark index prior to 1/1/2010 was the Oslo Stock Exchange Benchmark Index (OSEBX).
