

Performance Commentary

SKAGEN Vekst experienced a challenging month in absolute and relative terms as fears of a global pandemic spread through global markets. After the largest weekly fall in US indexes in over a decade, it has become clear that the outbreak of this aggressive new virus may not only impact victims but also the global economy and growth. Although it is still unclear what the full effects will be, equity markets are starting to price in a fairly severe impact and we can likely expect prolonged negative growth in commodities and energy. We entered 2020 with the optimism that global growth would reinforce the positive trends we had started to see in 2019. We now see a different scenario panning out, where the biggest perceived threat to global growth is no longer a trade war but lower global growth due to precautions put in place to halt a potential global pandemic. SKAGEN Vekst used the commotion in the market to increase positions where we see strong potential from direct yield return combined with strong value backing. We have therefore increased our positions in Equinor, SK Telecom and Millicom. We sold out of Lundin Petroleum following strong returns and reduced our exposure to global trade by selling out of Maersk and FLSmidth.

The fund selects low-priced, high-quality companies in the Nordic region and from around the world.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

Effective 1/1/2014, the Fund's investment mandate changed from investing a minimum of 50% of its funds in Norway to investing a minimum of 50% of its funds in the Nordic countries. This means that returns prior to the change were achieved under different circumstances than they are today. Prior to 1/1/2014, the benchmark index was an evenly composed benchmark index consisting of the Oslo Stock Exchange Benchmark Index (OSEBX) and the MSCI All Country World. The benchmark index prior to 1/1/2010 was the Oslo Stock Exchange Benchmark Index (OSEBX).
